

ENCODE-DECODE

OUTPUT:

The screenshot shows a window titled "Sneha- Encode and Decode". The main heading is "ENCODE DECODE". Below it, there are four input fields labeled "MESSAGE", "KEY", "MODE(e-encode, d-decode)", and "RESULT". The "MESSAGE" field is empty. The "KEY" field is empty. The "MODE(e-encode, d-decode)" field is empty. The "RESULT" field is empty. Below the input fields, there are two buttons: "RESET" (green) and "EXIT" (orange). At the bottom of the window, the name "SNEHA" is displayed.

The screenshot shows the same window as above, but now with data entered in the input fields. The "MESSAGE" field contains "Hello there!". The "KEY" field contains "sneha". The "MODE(e-encode, d-decode)" field contains "e". The "RESULT" field contains "wrvDk8ORw5TDkMKTv". The "RESET" and "EXIT" buttons are still present. The name "SNEHA" is still displayed at the bottom.
